PROFILE SUMMARY

Dedicated, organized, problem solver and collaborative team player with a passion for new challenges and a hunger for self-improvement, seeking an internship position to develop my professional career.

EDUCATION

California State University, Long Beach **Expected Graduation: December 2027**
Major: Computer Science with a concentration in Cybersecurity **GPA**: 3.3

Relevant Courses: Object Oriented Application Development, Algorithms, Discrete Structures I, Discrete Structures II, Data Structures, Computer Architecture and Organization, Digital Logic and Assembly Programming, System Programming, Data Security and Privacy

PROJECTS/ VOLUNTEER

Personal Resume Website **October 2026**

- Designed and built a responsive portfolio website using HTML, CSS, and JavaScript to showcase projects, skills, and experience.
- Managed version control with Git and deployed through GitHub Pages.

CIC PCUBED Summer Project **May 2024 - July 2024**

- Collected and processed stock price data from Yahoo Finance using C++ and other library classes. (vectors, sets, multisets)
- Used statistical calculations to watch stock movements and identify correlated pairs.
- Applied a pairs trading strategy that simulated trades when price spreads diverged and tracked performance through simulation.
- Better reinforced programming skills with parallel arrays, recursive functions, and algorithms, while gaining hands-on experience in finance and algorithmic trading.

STEM2/MESA - LEGO of Stress **February 2024**

- Supported student wellness activity by assisting with setup and facilitation of a LEGO-based stress-relief activity
- Engaged and built bonds with peers in a STEM focused environment

WORK EXPERIENCE

Nordstrom, Barista **August 2025 - Present**

- Delivered fast, friendly service during peak hours while collaborating with teammates to keep orders moving efficiently.
- Accurately processed complex orders and payments in the POS system and consistently met upsell goals.

SKILLS

- **Verification/Debug:** Testbenches, simulation, timing analysis, debugging
- **Programming Languages:** Python, C++, Java, MIPS Assembly, GitHub, Git, HTML, Linux
- **MS Office:** (Excel, Word and PowerPoint)
